Œuvre installative, frêne, corde, granit

Collection personnelle de l'artiste

Cette installation est une synthèse de ma vision et de mes préoccupations concernant la relation intergénérationnelle avec le territoire et la spiritualité. Les éléments spirituels que nos aînés utilisaient sur notre territoire, le Nitassinan, sont mon inspiration. Les trois objets principaux sont la tente tremblante, la tente à sédation et le tambour, tous des moyens de communication avec le monde des esprits ou celui du monde réel.

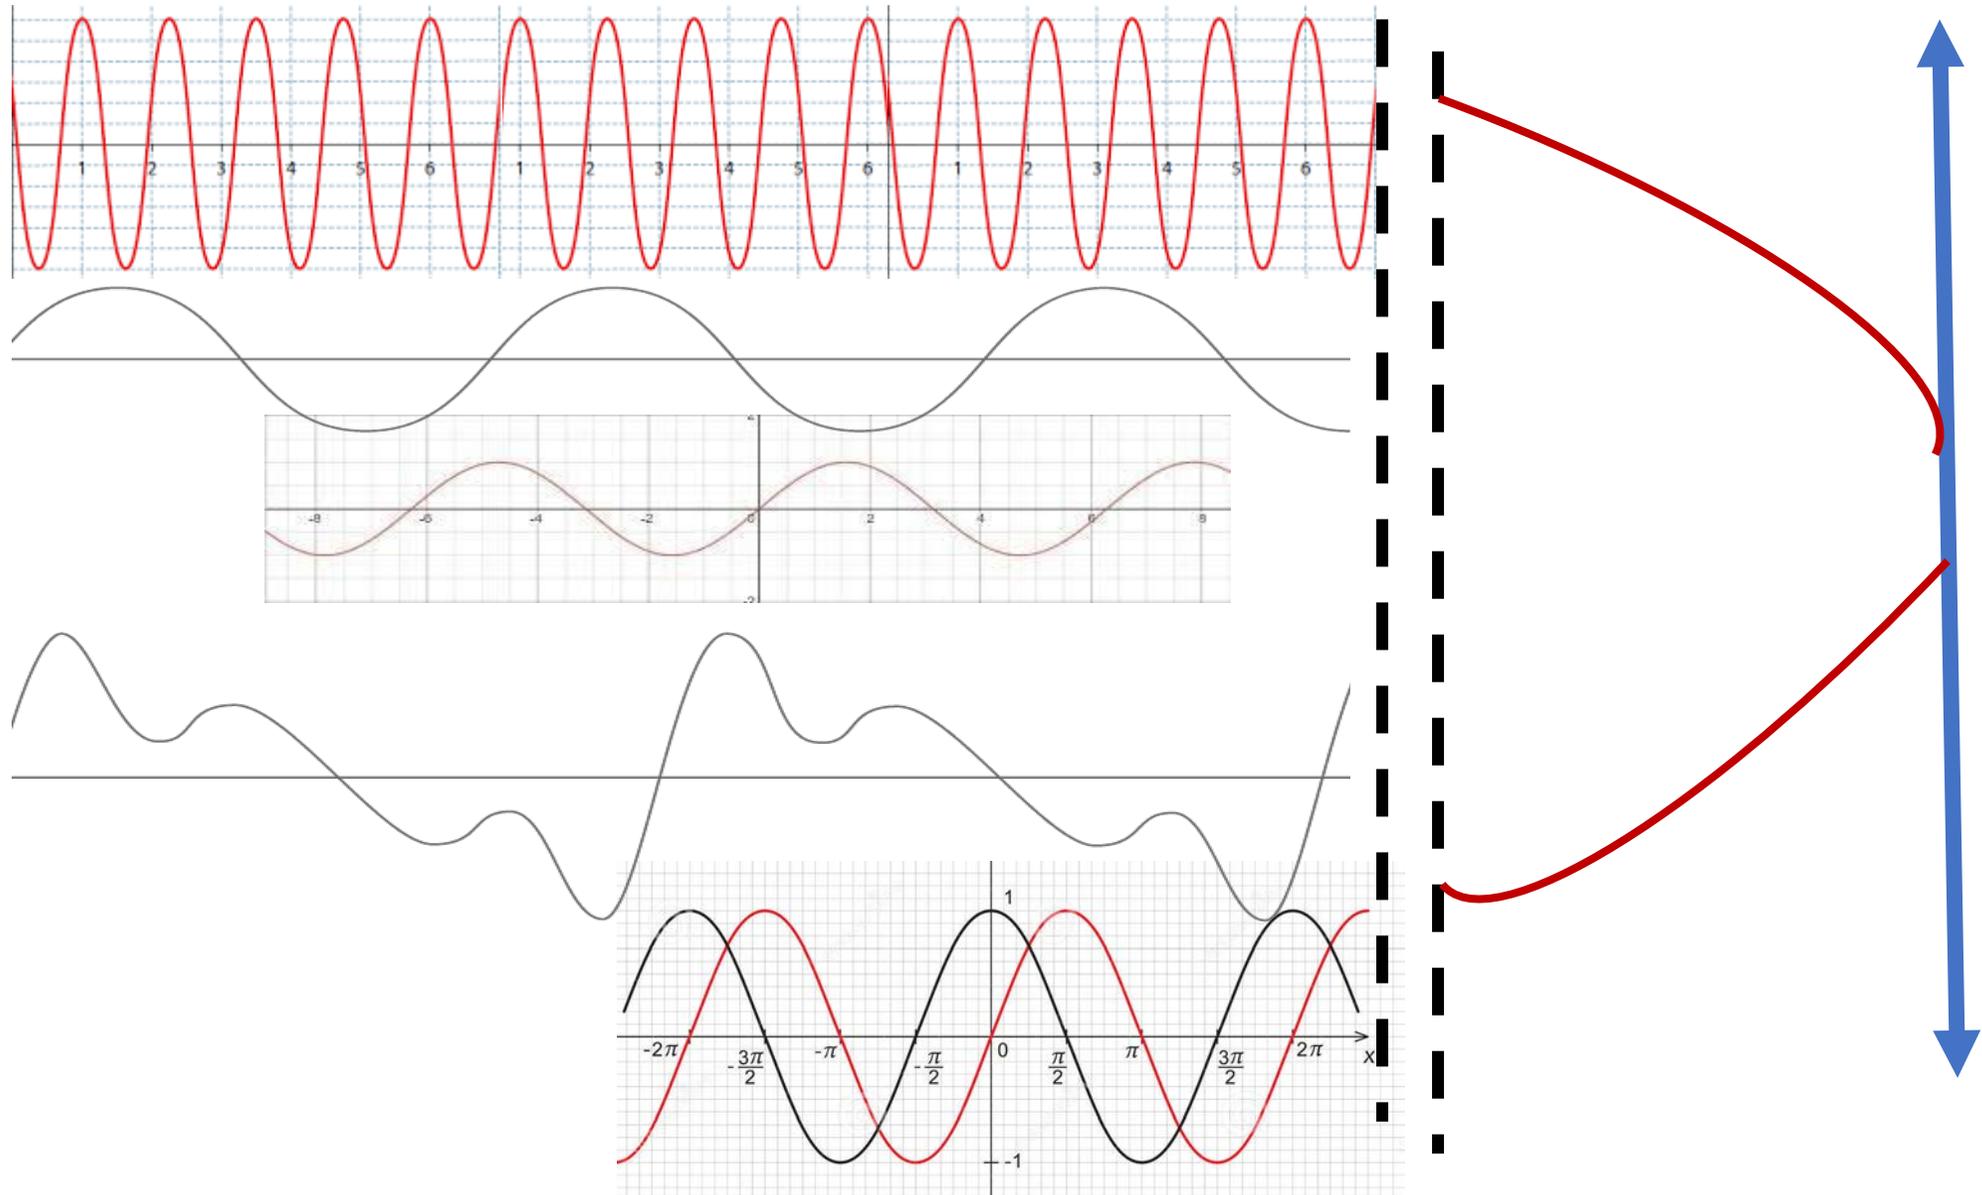

La structure de bois, réalisée en partie à l'aide du mukutakan (couteau croché), représente la tente tremblante et le tambour est suggéré à l'aide du deuxième morceau de bois qui s'emboîte sur le premier. Les cordes sous tension représentent la force de la jeunesse qui veut s'attacher et perpétuer sa culture. Les roches, objets sacrés de la tente suante, représentent nos aînés : nos ancres. La structure de frêne démontre la capacité d'adaptation des autochtones à travers le temps. Mon installation vise à recréer le mouvement migratoire sur le territoire ainsi que le mouvement invisible du monde des esprits à l'aide de la projection sur l'écran.
